

Dig Property Marketplace

 Date	@June 27, 2022
 Assign	
 Status	

This document serves as Project Charter for dig property marketplace. It includes agreed requirements and scope.

Description

Dig property marketplace is a web application that allows people from all over the world to list properties and profit from sale of their properties.

In sense of technicality, this marketplace is similar to a specialized NFT marketplace.

Requirements

1. Property NFT must be specific to each country laws.
2. Should the marketplace meet the jurisdiction of each country first before allowing listing? If so, the marketplace will ban countries with unclear NFT property laws.

Scope description

I understand that no one has clear scope of what this product will be, we are pioneers. Therefore, a preferred method would be to revise scope for every stage of this product.

This is scope for the next stage:

1. Structure of a real estate NFT:
 - Name: String (E.g. House A)

- Longitude: Decimal (E.g. 12.123)
- Latitude: Decimal (E.g. 13.123)
- Background Image: String (E.g. https://.....)
- Video: String (E.g. https://.....)
- Expiry date: Expiration (E.g. 1647032400000000000 or 3/11/2022 16:00:00 ET)
- Land Area (m²): Decimal (E.g. 12000)
- Construction Area (m²): Decimal (E.g. 10000) (It must be < Land Area)
- Description: String (E.g. This house is very)
- Status: Enum (E.g. Sold / On Sale / Going To Sell)
- Any more?

2. App development:

- <https://www.figma.com/file/epQrbbuaVWTF8rkZceJkDj/DIG-NFT>
- KYC to check nationality of seller.
